

TO WHOM IT MAY CONCERN:

Bryant Burns has worked with me for the past 6 months on several projects and he has consistently exhibited a broad based strategic, marketing, and sales acumen combined with a tireless work ethic.

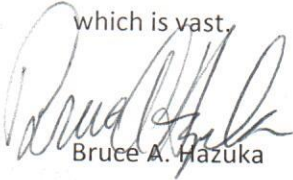

Bryant led the efforts to fund a new concept in mobility for paraplegics with our StandMaster2000 in T.O. Medical Mobility LLC and delivered numerous funding sources and investment conference presentation opportunities that we are currently evaluating for equity or debt financing. Bryant also presented these opportunities to his broad network and specifically presented at our conferences.

During this time period he also assisted in the positioning of the Company to identify customers for pre orders and numerous opportunities within the paraplegic community for future growth in product sales as well as identifying follow on products.

Bryant has also assisted me in monetizing the shares of a public, not trading Company, Bone Biologics Corp. that is waiting for Company determination whether to list on the BB/OTC or a Senior Exchange.

Bryant has been creative, thinks outside of the box, and has utilized his education and experience to add significant value to every opportunity that he has worked on for us. He is a high energy individual who will do whatever is required and put in whatever work effort is required to achieve success.

We continue to work with Bryant and would recommend him for any opportunity requiring his skill set which is vast.
